SUPPLEMENTARY NUTRITIONAL INFORMATION HANDLING & STORAGE INFORMATION

#### **Directions For Use**

BOIL IN THE BAG Fully immerse the pouch in boiling water; bring back to the boil and heat for approx. 1 hour, gently agitating the bag half way through. STEAM Place a pouch in a metal tray and make a tiny hole at the top, to release the pressure in the pouch. Steam for approximately 1hr. alternatively, empty the pouch contents into a suitable container large enough to accommodate the sauce and cover. The gastronorms provided should NOT be used to heat an entire pouch. PAN HEAT Empty pouch contents into a thick-based saucepan, heat thoroughly on a medium heat for approximately 45 minutes, stirring frequently to avoid burning, sticking or sauce spitting. Ensure that a minimum temperature of 82oC is reached throughout the product. Do not allow the sauce to boil, as this will impair the quality and may cause the sauce to spit HEATING FROM DEFROST Re-heating when defrosted:

- Sauces must not be steamed or boiled in the bag. This is because the pouch material may have become brittle during freezing.
- To heat on the hob follow the heating instructions contained within the customer guide. Ensure that the contents are heated to a minimum of 82oC. Do not re-heat products that have previously been heated.
