MARKETING
INFORMATION

Marketing Description

Arrowroot is excellent for thickening soups, sauces, and gravies, and can be used as a substitute for cornflour. It is gluten free and odourless and has a neutral flavour, therefore it can't be detected in recipes to which it is added. Its advantage over other thickeners when adding to fruit pies or desserts is that the acids do not break it down easily and so form an attractive glossy coating on open flans. As with cornflour though, it needs to be made into a slurry before adding to hot dishes, or it will form lumps, and it should be added at the end of cooking or it will not thicken adequately.

Manufacturer Comments

ECO CREDENTIALS: Use of nano film stretchwrap to wrap pallets securely and substituting virgin material in heat tunnel wrap and pallet toppers, with 30% recycled material, has noticeably reduced our plastic use. Minimum Order Quantities/mixed pallets: 1 case allowable but must be made up with other products from the range to create one full pallet to make best use of haulage/fuel use.
